### Workshop with parents and children

Name of the toy: Kind hearted bears

The goal of the workshop was to make a sensory toy for children aged 1 to 3. Our oldest group of children in our kindergarten decided to give their younger friends cuddlers and sleepers as gifts to make their stay in kindergarten easier.

This toy encourages children's personal and emotional development.

The materials we used were natural and unshaped: old and new socks, cotton wool, rubber bands, felt-tip pens, canvas, small bells for teddy bears with sounds.

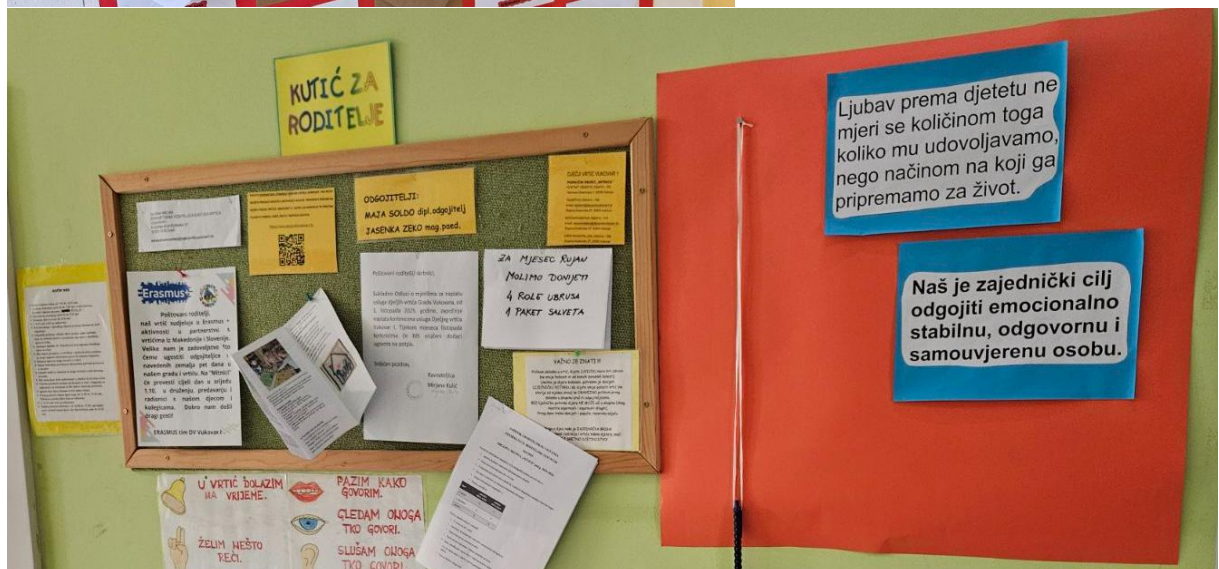

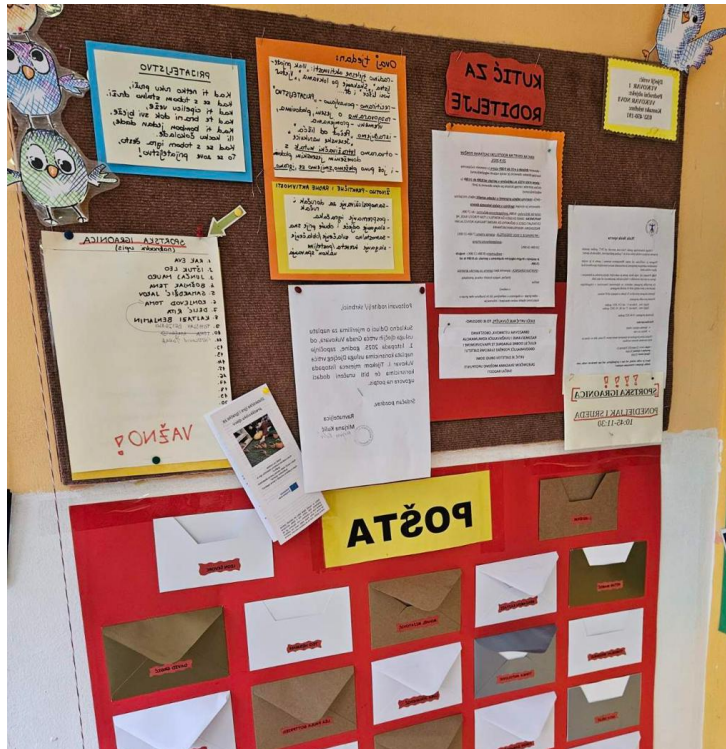

The duration of workshop was two hours.

Period of workshop: February 2025

Information about didactic toys displayed on the board for parents

As part of the promotion of project results to parents, we established a didactic toy lending library during the professional event *Creating Together for an Inclusive Kindergarten* held during Erasmus days. The collection, prepared and structured by Mateja Šrimf, includes didactic toys developed within the Erasmus+ project. Parents were given the opportunity to explore the toys, borrow them for home use and continue play-based learning in the family environment.
